## Everything you want to know about the Tecnam P2008

<https://www.tecnam.com/aircraft/p2008/>

Seventy-five uninterrupted years later Tecnam aircraft is still growing. The secret? Blending beautiful designs with enduring toughness

We all retire eventually, legacy aircraft included. Tecnam knows, they built their first airplane 75 years ago. Today seven elegant Italian designs now in production range from the two place P2008 trainer to the eleven place P2012 commuter airliner. With parts, customer service, a factory owned aircraft delivery center in Florida and our Tecnam Service center SouthTecAviation LLC near Charlotte NC, Tecnam aircraft dispatchability is second to none. We have a modern flight training solution for you with operating costs up to 30% less expensive than your legacy fleet.

Call us at Gulf States Aircraft Sales to arrange for a demonstration and for details on how we can build a state of the art Tecnam beauty for you.
